February 12, 2013

Dear Hunter Mill Friends,

We had a short Board of Supervisors meeting this Tuesday. Among our business items was approval the 2013 Disease Carrying Insect program and the forest pest management program. Last summer's weather proved to be a boon to the West Nile Virus carrying mosquitos. Our monitoring revealed that the West Nile Virus (WNV) was present all over the County. In addition, the Health Department reported 8 cases of West Nile Virus fever, one fatal, in Fairfax County. You can help with one of the best defenses against WNV by making sure mosquitos cannot breed in standing water on your property. For information on how you can help "Fight the Bite" and protect yourself and loved ones from WNV, as well as Lyme disease, check out the [Health Department website](#). Spring will be here before you know it, so be prepared.

The second installment of my special cable programs on African American History Month begins this week with a concentration on Vienna and the Floris area. You can catch the broadcast of "[Connecting with Supervisor Hudgins](#)" on the County's Channel 16. Check the website for program times and days along with a link for video on demand. I hope you will tune in!

NOTICE: *BEULAH ROAD has been reduced to one lane at the Dulles Toll Road. A new traffic light will control the cars making their way through this area. The lane closure was necessary to complete the addition of the pedestrian facilities to the bridge and to ensure safe passage for the traffic. The traffic light will be in place until work is completed in May 2013.*
